

AB 1305 DISCLOSURE

Harbor Distributing, L.L.C., and Crest Beverage, L.L.C., are committed to continuously lessening our impact on the environment. As part of our efforts to ensure a sustainable future, we have set ambitious climate goals aimed at reducing our greenhouse gas (GHG) emissions and overall environmental footprint.

Transparency is an essential part of our efforts. To that end, we use internationally accepted, science-based standards in setting and evaluating progress toward our specific goals, including the Greenhouse Gas Protocol, and have engaged reputable independent third-party verifiers such as Guidehouse, Inc. to ensure that our goals are realistic, our data is accurate, and our progress is real.

For more information on our climate goals and additional supporting data regarding our progress, please see our [annual Corporate Social Responsibility report](#).

SIGNIFICANT EMISSIONS REDUCTIONS CLAIMS

Harbor Distributing, L.L.C., and Crest Beverage, L.L.C., have made the following emissions reductions target:

- By 2030, we will reduce our combined scope 1 and scope 2 carbon emissions by 60%.

We are currently working with Guidehouse, Inc. to calculate our overall 2024 GHG emissions progress against a 2019 baseline. We have implemented the following emissions reduction strategies:

- Increased use of biofuels in our fleet.
- Investments in new fleet with the most recent technology advancements.
- Continuous improvement in fuel efficiency through reduction of idle time and cutting miles driven with strategic routing initiatives.
- Implementation of energy-saving technologies such as LED lighting and HVAC controls.
- Installing on-site solar panels at several locations.

We have worked with Guidehouse, Inc. to develop our target and are currently working with Guidehouse, Inc. to calculate and validate our emissions reductions compared against a 2019 baseline, and we have hired Guidehouse, Inc. to assist in gathering, calculating, and measuring our scopes 1 and 2 emissions data in accordance with the [GHG Protocol Corporate Account and Reporting Standard](#) and the [Corporate Value Chain \(Scope 3\) Accounting and Reporting Standard](#). Guidehouse, Inc. audits this data bi-annually, and we perform our own internal audit of emissions data on an annual basis.

For more information on our emissions reduction goals and additional supporting data regarding our progress, please see our [2023 Corporate Social Responsibility Report](#).
